DISCOVERY'S

# THE DARK SIDE OF THE SUN

NARRATED BY STING

March 14, 2018 6:00 p.m.

Parsons Auditorium  
Johns Hopkins Applied Physics Lab  
Laurel MD

**PANEL:**

Valentin Pillet,  
*Director, National Solar Observatory*

David Boboltz,  
*National Solar Observatory Program Director, NSF*

Anik DeGroof,  
*Solar Orbiter Instrument Operations Scientist, ESA*

Louise Harra,  
*Professor Solar Physics, UCL*

Angelos Vourlidas,  
*SoloHi & WISPR Project Scientist, JHU/APL*

Nicola Fox,  
*Parker Solar Probe Project Scientist, JHU/APL*

**MODERATOR:**

John M. Grunsfeld  
*Astronaut and Former NASA Associate  
Administrator for Science*

Directed  
by Nathaniel Kahn  
and Paul Bozymowski and  
featuring scientists and engineers  
from NASA's Goddard Space Flight  
Center, JHU/APL, NOAA, NSO and  
AURA the film offers unprecedented  
access to two cutting edge projects that  
will put us on the brink of solving the  
sun's mysteries, the National Science  
Foundation's Daniel K. Inouye Solar  
Telescope (DKIST) and NASA's  
Parker Solar Probe.
